Section S# – Selfmates

Final Award

Organizers: The Royal Moroccan Chess Federation (FRME)

Tournament director: Vidadi Zamanov (Azerbaijan)

International judge: Jiří Jelínek (Czechia)

Award publication: <http://frme.fr.nf>

58 problems from 26 authors 13 countries: **Azerbaijan** - Vidadi Zamanov, **Belarus** - Viktor Volchek, **Bulgaria** - Ognian Dimitrov, **Czechia** – Alexander Fica, Miroslav Svítek, Zdeněk Libiš, **Greece** - Dimitris Liakos, **Germany** - Torsten Linß, Gunter Jordan, Frank Richter, Sven Trommler, **Hungary** - János Csák, Béla Majoros, Kóczyán János, **Russia** - Yuri Gorbatenko, Alexandr Azhusin, Andrey Selivanov, Aleksandr Pankratiev, Aleksandr Kuzovkov, Yuri Arefyev, Mikhail Kostylev, Anatoly Slesarenko, Aleksandr Feoktistov, **Poland** - Waldemar Tura, Jan Lipka, **Slovakia** - Zoltán Labai, Jozef Holubec, Daniel Novomeský, Štefan Sovík, **Spain** - José Antonio Garzón, **Ukraine** - Gennady Kozyura (†), Sergey Borodavkin, Shalygin Oleg, **USA** - Steven B. Dowd.

At the beginning of October 2024, Vidadi Zamanov, the director of the tourney, emailed to me 58 numbered selfmates on anonymous diagrams. After their studying, I excluded several numbers due to: (i) anticipation **№40** (SuperProblem F220, may 2020); (ii) cook **№4**, dual **№23**; (iii) impossible position **№10**, **№13**, **№14**; (iv) withdrawal from the tourney **№35**. Before judging, I divided the remaining 51 problems into two groups: A) selfmates with (at least) two model mates, B) selfmates with strategical and logical contents. As to correctness, I tested the problems up to 10 moves by Gustav.

A) Selfmates with model mates (the Bohemian style)

Chameleon echo in combination with white AUW is composed for the first time. All promotions arise during the play being more difficult strategies, and promotions to couples R+S, and to Q+B in variations are far uneasier to construct than promotions to couples R+B, and to Q+S that one may find in majority of problems. I accept two (or more) solutions.

Theme Svoboda (type P&B, thematic pieces bPa3 & bBh6) in its extended form: the first mate by the bPa3, the bBh6 is captured; the second mate by the bBh6, the bPa3 is captured; the third and the fourth mates are given in participation of the both thematic pieces on the board. Four model mates.

Black AUW in a miniature. Three model mates. The fourth mate by the bQ is impure. Precedent problems: (1) T. Linss, 19106 Die Schwalbe No317 10/2022, S#11; (2) T. Linss, 1 Pr R. Zalokotsky MT 2022, S#13. In No19 – compared to (1) – as the Kings are located in the upper part of the chessboard, all mates are therefore given on the 7th and the 8th rank. Two white Queens are acceptable for such a task.

1.c4? Qxxh7!; 1.Ka5? This threefold chameleon echo is not new: yacpdb 299316, 2nd Pr A. Selivanov, S. Borodavkin 40 JT 2020. In No. 16, the bQ is however free, and the mechanism is sufficiently different. The tries are a bonus.

The author's comment: „Puzzle with mating moves of the bB to g2, f3, e4. The power of the wRh4 is switched off differently in each case. Change of functions of the black-squared Bishops with regard to covering/blocking b8/a7.“ Well known static echo (3 diagonal model mates) in the corner enriched by an inventive play (namely in the variation after 1.-. Bf2) cutting off the wRh4 (6.Sf4+, 7.Sg4+) on neighbouring squares of the fourth rank.

Meredith, minimal. A nice key to the corner. Not very common chameleon echo mates (known from the year 1981) by the bR are enriched by one more (different) mate.

№7. Mikhail Kostylev (Russia) Commendation

1.Qh8 zz, 1.- Ke3 2.Qh3+ Kf2 3.Se4+ Rxe4 4.Qg2+ Ke3 5.Bg5+ Rf4 6.Rc4 Kd3 7.Qh3+ Rf3 8.Qf1+ Rxf1#, 1.- Kc3 2.Sd5+ Kd3 3.Ke1 Kc2 4.Qb2+ Kd3 5.Qa1 Kc2 6.Se3+ Kd3 7.Se5+ Kxe3 8.Qc1+ Rxc1#. I admit that this classical Rook dynamic echo was made countless times by many composers. Nothing new. But the graceful Aristocrat position impressed me a lot where all officers are equally scattered throughout the whole area of the board, standing mostly on white squares being aesthetically pleasing at first glance. A corner-to-corner key of the wQ appearing in three corners, its sacrifices in mates from both sides of the first rank, simply an unforgettable problem.

Fata Morgana containing typical chameleon Rook mates on neighbouring squares. Many switchbacks by Bishops (5.Bg8+, 7.Bh7+, 9.Bg8+), the Queen (8.Qg6+), the black King (6.- Kf5, 7.- Ke6, 12. - Kd6), and the Rook (5.- Rf7, 8.- Rf6). There are short continuations (tested by Gustav) after defences: 1.- Rxf4? 2.Qh3+, S#11; 1.- Rf5? 2.Bg7!, S#11; 1.- Kf5?? 2.Bh7+ so that the problem is correct.

The author comment is accurate: White's plan is to wait until Black gets in zugzwang (Bxg2#) but he has not enough waiting moves to counter Black's waiting moves (White is also in zugzwang). The only way to do this is to dismantle the existing mating net and then recreate it, with a complicated maneuver.

White and black battery play. In the first three variations, the wR is sacrificed on neighbouring squares of the d-file which opens the appropriate rank. The wQ taking advantage of this open line is then sacrificed on the relative square of the this rank. As a result, the bK battery is formed being ready to mate after the wB sacrifice.

Aristocrat and miniature. Exchange of positions between wQ/wR: Umnov 4.Qd8/5.Ra5. A good co-operation between white heavy officers. I do not know whether this long selfmate is really correct. According to the author it is.

White must choose a different strategy, i. e. to get rid of the bP guard of the f6 square, to return with the wK on the diagram square, and to block all flights as well. On the way to this goal can be found: Umnov 2.Sce5, 4.a4, 9.d4, switchbacks of the bB and the wK, delayed FML 8.Ke5.

Round-trip of the bK (from the 5th to the 9th move), return (5.Bf2+), and anti-Phénix (4.h8Q+/10.Qg1+ hxg1). Four promotions 10.- hxg1Q/R/B/S are no duals because those are just black defences.
